

DANMON GROUP

ATG DANMON UK

ATG Danmon is one of the world's most successful providers of high-end reliable and easy-to-operate integrated systems for broadcasters and programme makers.

Active in Europe, Asia, Africa and the Middle East, ATG Danmon is part of the Dan Technologies Group which operates from offices in the United Kingdom, Germany, Denmark, Norway, Portugal, Spain, Sweden, the United Arab Emirates and Vietnam.

Nederlands Omroepproductie Bedrijf, the Dutch Broadcasting Organisation, commissions new multi-channel transmission facility for SBS in Amsterdam

The Dutch Broadcasting Organisation, NOB (Nederlands Omroepproductie Bedrijf), selected ATG Danmon to design and build a new multi-channel transmission facility for SBS in Amsterdam, Holland.

Installation commenced in June 2002 and the first channel was on air by the end of July 2002. Completed in August 2002, the new facility allows concurrent transmission and monitoring of three separate channels: Net5, SBS6 and V8.

The project encompassed the installation of a master control room and apparatus area in a new building in the heart of

Amsterdam, together with the equipping of the first broadcast chain. Following the start of transmission, ATG Danmon relocated equipment from the former site to provide the full complement of facilities.

SGT Automation and GVG Profile video servers formed the heart of the system.

NOB project managing consultant Gerrit de Nooijer commented:

"ATG has a proven track record in the supply of transmission facilities and was able to provide NOB with a dynamic approach and pricing structure that met our specified requirements."
